Explore the range and find the right fit for your home or business.

THE MAX SERIES

Find your MAX.

Five models, compared by application, construction and locking.

Model / operation	Application	Construction	Locking
MAX Forte Retractable	Flagship for higher-risk openings	Steel, reinforced double uprights	Two locking points; single-key slamlock
MAX Core Retractable	Versatile high-security protection	Steel, double uprights	Single slamlock
MAX Edge Retractable	Coordinated gate and burglar-guard design	Steel, double uprights	Single slamlock
MAX Alu Retractable	Coastal and lower-risk openings	100% aluminium, single upright	Single slamlock
MAX Swing Hinged	Entrances suited to a swing gate	Custom steel frame	Slam lock or double-throw deadlock options

The detail that makes the difference

Forte has two locking points. Core and Edge use single slamlocks, with different flight designs. Alu offers aluminium construction for coastal, lower-risk applications. Swing opens on hinges.

All retractable models include aluminium top and bottom tracks. Every MAX model features an aluminium lock section. Ask our team to confirm the right configuration for your opening.

THE MAX SERIES

Retractable steel gates

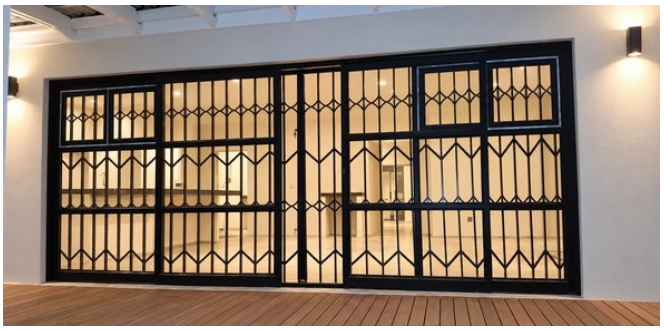

MAX Forte

Flagship protection

- Reinforced double-upright steel construction
- Combination flight system
- Two locking points with a single-key slamlock
- Aluminium top and bottom tracks, aluminium lock section and back channel

Corner patio installation

PRODUCT ANATOMY

Inside the MAX Forte

A closer look at the components, operation and construction.

1 Aluminium top track

Supports controlled, smooth retractable movement.

2 Reinforced double uprights

The gate's robust vertical steel structure.

3 Combination flight system

Curved flights and strong braces reinforce the barrier.

4 Aluminium lock section

Houses the double-locking-point slamlock and helps resist rust and corrosion.

5 Aluminium frame

Completes the barrier around the opening.

6 Aluminium bottom track

Guides the gate smoothly during everyday operation.

7 Two locking points

The central slamlock engages two locking points.

Front elevation. Illustration not to scale.

PRODUCT ANATOMY

Inside the MAX Edge

A closer look at the components, operation and construction.

1 Aluminium top track

Supports smooth, controlled retractable movement.

2 Double-upright construction

Paired steel uprights provide dependable strength.

3 Refined flight configuration

A consistent curved pattern creates its streamlined look. The flight pattern can be matched with burglar guards.

4 Aluminium lock section

Houses the single slamlock and helps resist rust and corrosion.

5 Aluminium back channel

Provides improved resistance to rust and corrosion.

6 Aluminium bottom track

Guides the gate as it opens and closes.

Front elevation. Illustration not to scale.
